

**Instalar JWT (<https://github.com/firebase/php-jwt>)**

composer require firebase/php-jwt

**Instalar tuupola (<https://github.com/tuupola/slim-jwt-auth>)**

composer require tuupola/slim-jwt-auth

**Criando tabela usuarios**

```
create table usuarios (  
    id int not null primary key AUTO_INCREMENT,  
    nome varchar(100) not null,  
    email varchar(150) not null,  
    senha varchar(32) not null  
)
```
